ABOUT ME

As a computer science student, I possess strong analytical and problem-solving skills, with proficiency in various programming languages. My eagerness to learn and adapt to new technologies makes me valuable asset to any organization. And I am looking forward for my first work experience.

DIGITAL SKILLS

DATA STRUCTURES AND ALGORITHMS WITH JAVA | Microsoft Office package: Microsoft Word, Excel, PowerPoint, Access | Java | Html / CSS / JavaScript | Python | Knowledge of SQL. | Cpp programming language | Wordpress | Python (Tkinter, Matplotlib, NumPy, Pandas) | Python and Streamlit

EDUCATION

11/10/2021 – CURRENT
Bachelor Of Science - Computer Science

Sukkur IBA University

2018 – 2020
Intermediate, Pre-Medicine/Pre-Medical Studies

Govt. Girls Higher Secondary School

PROJECTS

RESTAURANT MANAGEMENT SYSTEM USING JAVA

This system automates restaurant operations, enabling online ordering and reservation management to replace paper-based methods.

ACHIEVEMENTS

Merit Based Scholarship

Currently I am seeking my bachelor degree in computer science at Sukkur IBA University on a merit based scholarship. Achieving a merit-based scholarship involves demonstrating outstanding academic, or personal achievements to distinguish oneself as a high-achieving candidate.

Winner of Data Pirates competition in Java

This achievement underscored my unwavering dedication, as well as the persistent hard work I invested in mastering Java.

Organizer in Bivenue party event

CGPA:3.57

Participated in "Code Sprint Competition" at Procom'24
